

Engineered for Power, Built to Last

Tesab 700i Jaw Crusher

Based on the proven 10570, the New 700i is a more streamlined and powerful tracked jaw crusher designed with contractors in mind.

With its user friendly design, the 700i is now easier to maneuver onsite and transport around various markets due to its new weight and dimensions while still maintaining the original jaw crushing unit.

Featuring Tesab's new and improved step deck vibrating feeders, allowing a higher throughput tonnage, improved material separation quality and the ability to handle dry, damp or wet material – the 700i is a highly versatile jaw crusher that can be set up in minutes!

The 700i can be fed by excavator as a standalone unit and also integrates easily into the Tesab range of secondary crushers and screeners.

Performance Specification

| Production Rate | Max Feed Size | Reduction Ratio | Engine Size | Pre Screen |
|-----------------|---------------|-----------------|-----------------------|------------|
| 350+ TPH* | 700mm (28") | Up to 4:1 | CAT or Scania Options | Yes |

* Depending on material density and set-up

Dimension Specification*

| Transport Dimensions | | | Working Dimensions | | |
|----------------------|------------------|-------------------|--------------------|--------------------|--------------------------|
| Height | Width | Length | Width | Length | Weight (Est.) |
| 3,460mm (11' 4") | 3,260mm (10' 9") | 16,680mm (54' 9") | 4,650mm (15' 4") | 16,120mm (52' 11") | 46,720 Kgs (103,000 lbs) |
