

At the heart of the QA451 is the Triple deck Doublescreen box, featuring two independent triple deck screen boxes. Both feature independent drives and can have their amplitudes and combined screen angles adjusted dependant upon application. The QA451 offers a screening solution no other mobile triple deck screener can provide as its two screen boxes offer an unsurpassed level of separation on a wide range of materials, at very high rates of production.

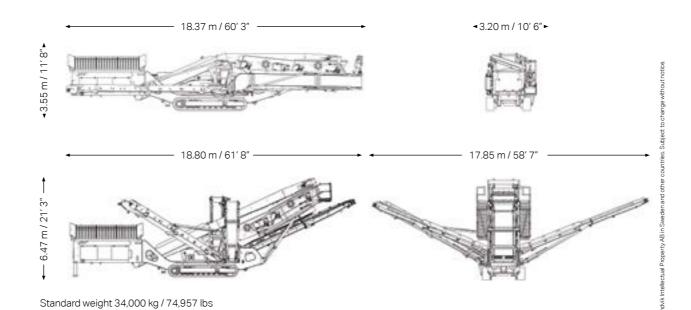

Clean gradings, at very high output, are produced as material is exposed to a very large screening area

TECHNICAL SPECIFICATIONS

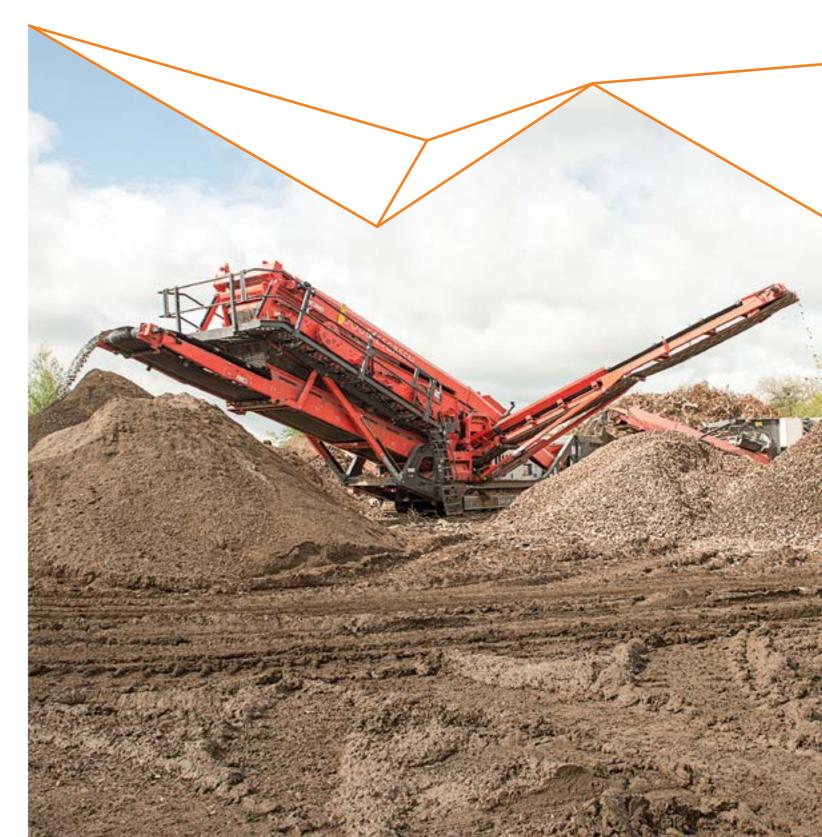

KEY SPECIFICATIONS	DATA	KEY SPECIFICATIONS	DATA
Screen type	2 off screenboxes, 2 Bearing 3 Deck	Power pack	
Screen box size	20' x 5' / 6 x 1.5 m	Engine CAT C4.4 Stage 5 / T4F 98 kW / 13 T4F 98 kW / 132 hp Stage 3A Constant Special Stage 3A Constant Special Stage 3A kW / 132 hp Tier 3 96 kW / 129 hp Diesel tank size 290 litres / 76.5 USG	
Tensioning system	Manual Ratchet		
Speed	1200 rpm		
Throw	7.7 mm		
Motor	49 cc x 2	Hydraulic tank size	370 litres / 98 USG

Note. All weights and dimensions are for standard units only

ULTIMATE SCREENING SOLUTION

Sandvik QA451 is the world's first triple deck Doublescreen which offers you unrivalled throughput and control. Through years of research, customer feedback, and Sandvik's extensive experience in the field, we developed this innovative machine which provides you with massive stockpiling capabilities, a more user-friendly, efficient and productive unit.

The QA451 is designed specifically to work in closed circuit with our tracked secondary and tertiary crushers. The hydraulically folding fourth product conveyor slews and raises/lowers hydraulically to optimise the feeding position to these upstream units. Alternatively, the QA451 can work as an extra-large stand-alone screening and stockpiling system producing four sized products with a fifth oversize material scalped off at the grid.

FEATURES INCLUDE:

- High production capabilities due to its phenomenal Doublescreen system - two in-line, independently vibrating 10' x 5' / 3 x 1.5 m triple deck screenboxes
- Four on-board hydraulic folding stockpilers
- Enlarged oversize conveyor chute prevents bottle necks and ensures free flow of material.
- Large volume hopper complete with remote control hydraulic tipping grid
- Fully compliant with the latest safety regulations
- Capable of working in the most hostile of environments
- Designed for optimum fuel economy and low operating costs.

- 700 mm / 28" wide belt with a discharge height of 4915 mm / 16' 9" for enormous stockpiling capability
- Hydraulically folds forwards alongside screenbox and walkway for ease of transport

- 700 mm / 28" wide belt with a discharge height of 5130 mm / 16'10" for massive stockpiling capability

- Triple deck 20' x 5' / 6 x 1.5 m equivalent patented Doublescreen for high production capabilities
- Easy-change mesh facility with highly efficient ratchet tensioning system
- Hydraulically folding walkways for ease of maintenance

- 4 Main conveyor - 1000 mm / 39" wide variable speed feed
 - Can be hydraulically raised up from screenbox to enable quick mesh change and easy maintenance

5 Fines tail conveyor

stockpiling capability

- 1200 mm / 47" wide belt with a discharge height of 5030 mm / 16' 6" for massive

Oversize conveyor

- Hydraulic raise / lower and hydraulic slew function for quicker set-up times, stockpile clearing and recirculating with secondary and tertiary crushers
- 650 mm / 26' wide belt for maximum oversize material removal
- Discharge height 4897 mm / 16'1" for enormous stockpiling capability
- Compatible with optional vibrating grid

- Large volume hopper complete with remote control hydraulic tipping grid
- Vibrating grid available as an option
- Variable speed belt feeder, heavy dutyroller bed and heavy duty belting
- Heavy duty feeder drive system for increased throughput

Power pack

- Diesel driven emissions compliant
- User friendly push button control panel with sequential start-up for ease of
- Easy access to the engine compartment for service and maintenance
- My Fleet telematics

- 500 mm / 20" wide tracks driven by proportional umbilical control
- Radio remote control, proportional tracking as standard

- Modern chassis design on tracked frame ensures maximum durability
- Hydraulic legs for increased stability and servicing capabilities

STANDARD FEATURES

Hydraulic slew and raise / lower facility

Remote control for ease of mobility

Patented triple deck Doublescreen technology

Simplified control panel for ease of operation

Hydraulically folding walkways for ease of maintenance Massive stockpiling capabilities
